Acronis System Report (64-bit)

Start Windows

Backup and restore

 Create backup task Manage and restore Home > Backup and Restore Tasks and Log > Protection State > Try&Decide > Utilities > Search >

Data to back up selection

My Computer

Create an image of the entire disk or a partition.

My Data

Specify files and folders you want to back up.

System State

Create a backup of your current system state.

My E-mail

Back up e-mail accounts and address book.

My Application Settings

Back up application settings.

My Computer

Backing up the entire system disk consumes greater disk space but enables you to restore the entire system in minutes in case of a system crash or hardware failure.
